

evo22.com Wireless Suite Overview

SMS, or Short Messaging Service, had been an enormous success in wireless communication networks, with billions of SMSs being delivered from mobile to mobile daily. It is not stopable and will continue to grow and evolve.

For us, SMS is NOT just a text messaging service from one mobile to another. It is a powerful communication tool that comes with huge potential in automating business processes, a tool that is able to reduce operation overhead costs, and a tool that is able to improve customer service and satisfaction level.

In evo22.com, we create business solutions using this widely available SMS technology. We have a great vision and mission to provide various SMS tools and applications in improving your business operations. Ultimately, we are here to help you reduce the ever-growing overhead costs, improve the efficiency of your delivery mechanism, and finally increase profitability.

evo-ContactMe

This is a corporate SMS mailbox. It works the same way like email; except that messages can now be sent from a mobile phone using SMS.

In comparison, sending SMS is far more handy than to turn on PC, connect to Internet, launch email program, and finally send an email.

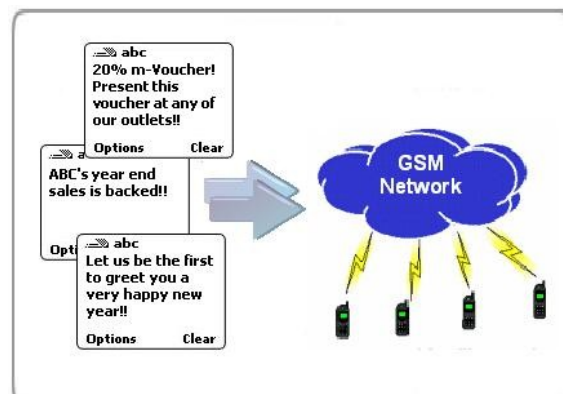

evo-ContactMe allows you to configure your preferred auto-reply message. The auto-reply SMS is sent with **NO** additional cost to you.

evo-BROADCASTOR

This tool allows you to send SMS messages instantly to your customer base. The SMS message can be ranging from your sales promotion, customers' update, outstanding payments, to festive greetings, and etc.

Please take note that this service requires a pre-paid credit to operate. Refer to the rate table in the pricing page for more details.

evo-VOUCHER

evo-VOUCHER lets your customers to download your promotion voucher, right from their mobile phone.

You can easily configure any voucher message, quantity and validity period. All SMS vouchers are sent at your clients' fingertips' request, with **NO** additional cost to you.

This way, you are able to save cost in printing and distributing hard copy discount/cash vouchers; attracting interested customers, while able to build up a customers contact database for future marketing campaign.

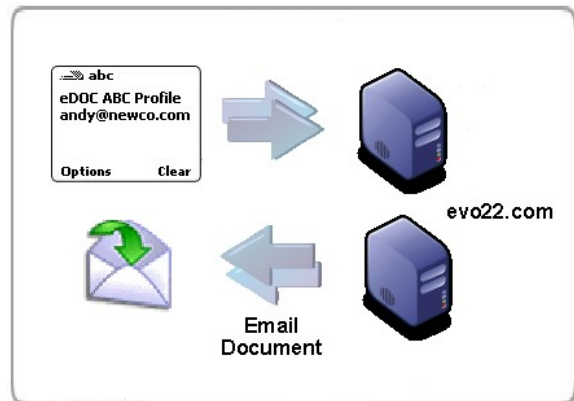

evo-DOCUMENT

evo-DOCUMENT allows your customers to download, using SMS, your product brochure, newsletter, manual, catalog, registration/sign-up form, investors' report and etc. into their email.

You can upload and create as many documents as possible for customers' download. All documents are delivered at your clients' fingertips request, with **NO** additional cost to you.

This way, your customers are able to conveniently download the intended document/s, without the need to surf through your sophisticated company website.

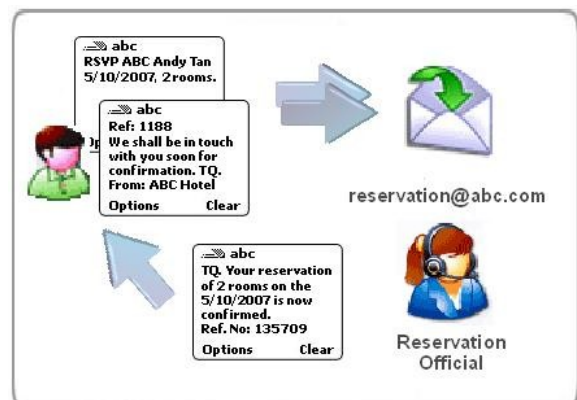

evo-RSVP

evo-RSVP enables your customers to send their reservation request to your reservation center, right from their mobile phone. evo-RSVP will then deliver this request to your reservation center's email address.

Each RSVP request is tagged with a unique tracking/reference number. For each RSVP request, your clients shall receive your pre-configured auto-reply SMS, with **NO** additional cost to you.

With evo-RSVP, communication infrastructure in your reservation center is now complete with accessibility by telephone, email, fax, and the most convenient wireless channel.

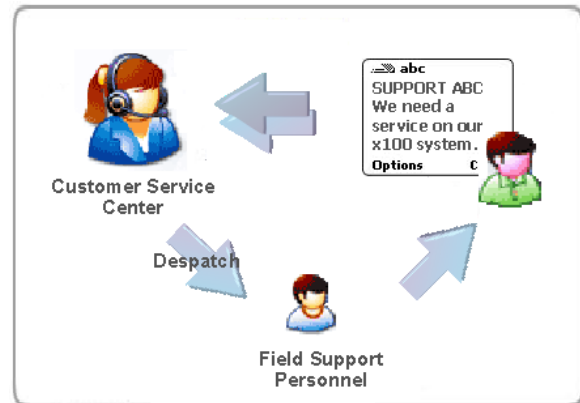

evo-SUPPORT

evo-SUPPORT enables your customers to send their support request to your customer service center, right from their mobile phone. evo-SUPPORT will then deliver this request to your customer service center's email address.

Each support request is tagged with a unique tracking/reference number. For each support request, your clients shall receive your pre-configured auto-reply SMS, with **NO** additional cost to you.

evo-CRM

evo-CRM is a database tool. It allows you to profile your customers according to race, location, products, level of loyalty, payment history, and etc.

The criteria search function lets you retrieve the most relevant customers list for your up-sell and/or cross-sell marketing activities. With the search result, you are given options to send them SMS, or have the list email to you.
